

TANG SEW PENG

SENIOR SYSTEM ANALYST

tangsew@yahoo.com | +60 12-236 2207

PROFESSIONAL SUMMARY

Senior System Analyst with experience across IT infrastructure, banking systems, application support, project coordination, system implementation and User Acceptance Testing (UAT). Experienced in production support, Linux server administration, Oracle database maintenance, disaster recovery exercises, system monitoring and cross-functional coordination. Combines hands-on technical support with delivery coordination, requirements analysis and stakeholder management.

CORE SKILLS

Application Support (L2/BAU) • Linux Administration • Oracle Database Support • IT Infrastructure & VM Provisioning • Disaster Recovery • System Monitoring & Performance • UAT & Defect Management • Project Coordination • Business Requirements Analysis • Vendor & Stakeholder Management

PROFESSIONAL EXPERIENCE

1.Senior System Analyst | Microlink Systems Sdn Bhd

September 2017 – Present

A. Job Scope

Responsible for IT infrastructure and system support, application production support, project implementation, database maintenance, disaster recovery, system monitoring, and technical coordination for banking and enterprise systems.

B. Key Responsibilities

1. Application Support & BAU Operations

- Provide Level 2 (L2) Business-as-Usual (BAU) support for CBP CFOS.
- Support production operations and ensure system stability and availability.

2. IT Infrastructure & System Administration

- Perform Linux server administration, virtual machine provisioning, application deployment, and infrastructure maintenance.
- Monitor server resources, system performance, and infrastructure health.
- Support VMware/Proxmox virtualization and infrastructure implementation projects.

3. Oracle Database Support

- Coordinate annual Oracle database partition creation and maintenance.
- Support database patching activities and coordinate with DBAs on database-related issues.
- Assist with system recovery and database operational activities.

4. Disaster Recovery (DR)

- Work with application, database, and infrastructure teams to execute recovery activities.
- Support system recovery validation and business continuity readiness.

5. Monitoring & Performance

- Lead the WhaTap monitoring Proof of Concept (POC) for MBIB.
- Support system performance investigation and monitor improvements.

6. Project Coordination & Documentation

- Prepare three-year project budget quotations and infrastructure cost estimates.
- Prepare Request for Proposal (RFP) documentation for the RCE project.
- Coordinate with customers, vendors, developers, DBAs, and infrastructure teams.
- Support infrastructure initiatives, including CBP and RHB SIT VM environment setup and Project Gamuda.

C. Key Achievements

CFOS Production Go-Live — April 2025

Successfully supported delivery of the CFOS project through production go-live and continued with L2 BAU operational support.

WhaTap Monitoring POC — May to August 2025

Led the MBIB monitoring proof of concept to evaluate application and infrastructure performance monitoring.

CBP Full Disaster Recovery Exercises — December 2025 and January 2026

Coordinated and supported DR exercises, including recovery activities and system validation.

2.Senior Executive I / Senior Executive II | AmBank Berhad

2008 – November 2016 | Promoted to Senior Executive I in 2014

A. Job Scope

Responsible for banking IT infrastructure deployment, project coordination, business requirements analysis, User Acceptance Testing (UAT), system implementation, and operational support across headquarters and regional offices.

B. Key Responsibilities

1. Project Coordination & Delivery

- Coordinate IT projects and implementation activities to meet timelines and project requirements.
- Support the Section Head in monitoring project progress and delivery.
- Liaise with business users, Group Information System (GIS), vendors, and internal IT teams.

2. User Acceptance Testing (UAT)

- Coordinate end-to-end UAT activities, including test planning, test-case preparation, execution, defect tracking, and reporting.
- Assign testing activities to team members and monitor progress.
- Maintain test documentation and coordinate defect resolution.

- Conduct user requirement studies and prepare Business Requirements Specifications (BRS).

3. IT Infrastructure Deployment

- Manage hardware and software procurement, installation, configuration, and deployment.
- Coordinate desktop, laptop, communication facilities, and user readiness.

4. Banking System Implementation

- Support implementation of the EPF Kiosk Project and Mobile EPF Kiosk devices.
- Coordinate infrastructure delivery for SMS and eFax services supporting Credit Card Sales and Personal Finance divisions.
- Coordinate Managed File Transfer (MFT) implementation with AmBank IT.

C. Key Achievements

- Career progression: Promoted from Senior Executive II to Senior Executive I in 2014.
- UAT coordination: Coordinated end-to-end UAT activities, including test execution, defect tracking, progress monitoring, and reporting.
- Banking project implementation: Supported EPF Kiosk and Mobile EPF Kiosk initiatives, SMS facilities, and eFax services.
- Cross-functional collaboration: Worked with GIS, business users, vendors, and IT teams to support project implementation and issue resolution.

EDUCATION

2001–2002 | Degree in Computer Science — FTMS – De Montfort University (Campus Malaysia)

1999–2001 | Higher Diploma in Computer Science — FTMS – De Montfort University (Campus Malaysia)

1994–1996 | Certificates in DPM and CPIP — Tunku Abdul Rahman College (TAR College), Kuala Lumpur

1993 | Sijil Pelajaran Malaysia (SPM) — Sekolah Menengah Kebangsaan Taman Ehsan

PROFESSIONAL DEVELOPMENT

- 2026 – Mastering Microsoft Copilot Studio: From Custom Agent Development to M365 Extensibility (Certificate of Attendance)
- 2026 – Redefine What's Possible with Oracle Technology (RWPOT) (Certificate of Attendance)
- 2025 – AI-Driven Security: Microsoft Identity, Compliance & Cyber Defence (Certificate of Attendance)
- 2025 – Microsoft AI-900: Azure AI Fundamentals (Certificate of Attendance)
- 2024 – Unmasking Cybersecurity and Taking Control; AI AWS; Microsoft Copilot (Certificates of Attendance)
- 2023 – Microsoft Azure Administrator (Certificate of Attendance)
- 2022 – Implementing and Administering Cisco Solutions v1.0 (Certificate of Attendance)

ADDITIONAL STRENGTHS

Experience supporting Multi-Function Devices (MFD), EPF kiosks, ATMs and Cash Deposit Machines (CDM). Proactive and independent, with strong communication skills and the ability to work effectively with business users, technical teams, vendors and stakeholders at different organizational levels.
